

Faunakram 8L White Bentonite Cat Litter active carbon (10414-50)

10414-50

Faunakram 8L White Bentonite Cat Litter active carbon (10414-50)

Faunakram CAT LITTER – WHITE BENTONITE with active carbon. Active carbon absorbs 99% of any unpleasant odors from the litter box.

The white bentonite has a strong clumping ability and quickly forms clumps around the cat's urine and feces. This encapsulates bad odors and makes it easy to remove the clumps and keep the box clean.

This bentonite is 99.5% dust-free, which prevents stains from the cat's paws after visiting the litter box.

COMPOSITION:

100% white Bentonite (clay)
