Faunakram 7,6l Silica cat litter with lavender scent (10415-10)

10415-10

Faunakram Silica cat litter with lavender scent 7,6L

Each grain contains millions of microscopic pores that absorb liquids. Odors and impurities are trapped inside the litter. Its absorption capability allows you to use less litter. The size and shape of the cat litter ensures it doesn't cling to the cat's fur or paws. Emits minimal dust.

Instructions: Fill the litter box to a depth of 3.5 - 4 cm. Place the litter box in a dry, warm location. Remove solid waste daily to maintain a clean and fresh litter box. Completely change the cat litter approximately once every 8-14 days. Help your cat get used to this new cat litter by mixing this new litter with their old litter for a period of time.

NB: Pregnant individuals and those with a weakened immune system are advised against cleaning litter boxes. Cat litter should not be flushed down the toilet.

Composition:
Silicon dioxide, min.99%
